PROFESSIONAL SUMMARY

Full Stack MERN Developer with 3+ years of experience building and shipping production-grade, cloud-native applications across EdTech, healthcare, and travel domains. Delivered measurable results including a 40% improvement in claims throughput and 35% gains in reporting speed using microservices and query-optimized APIs. Experienced in leading delivery, owning backend systems, and driving end-to-end feature execution.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java

Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS, Material UI, Bootstrap, Redux, Storybook

Backend: Node.js, Express.js, NestJS, GraphQL, REST APIs, BullMQ, Kafka

Databases: MongoDB, PostgreSQL, MySQL, Redis

Cloud & DevOps: AWS (S3), Google Cloud Run, Pub/Sub, Docker, Kong API Gateway, Git

AI Tools: GitHub Copilot, ChatGPT, Cursor, DeepSeek, Claude

Methodologies: Agile, Scrum, Microservices Architecture

EXPERIENCE

Full Stack Developer | NorthStar Academy *Jun 2026 – Present | Bengaluru*

- Building LearnEx, a multi-portal CRM/course-management platform (Admin, Tenant/Partner, Student) using NestJS, React.js, and MongoDB.
- Designed RBAC and a multi-portal authentication system (JWE cookies, Google OAuth) for secure access across all three portals.
- Built the course structure builder, AWS S3-backed content library, and partner onboarding with commission-based billing.

Software Engineer | Twilight IT Solution *May 2023 – Jun 2026 | Puducherry*

- Engineered 4 production applications across healthcare, travel, and pharmacy domains using the MERN stack and NestJS.
- Built REST and GraphQL APIs raising claims processing throughput by 40%; added Kafka/BullMQ event-driven microservices for fault tolerance.
- Set up Kong API Gateway and Redis caching across 10+ services, cutting third-party integration effort and API latency.

PROJECT HIGHLIGHTS

ASP-RCM Medical Platform | *NestJS · GraphQL · PostgreSQL · Kafka*

- Built a dual-portal claims processing system for hospitals and insurers; decomposed the workflow into Kafka-driven microservices, raising throughput by 40%.
- Configured client-specific workflow access so users work the full RCM lifecycle or only specific flows, based on each assigned client's pricing plan.

TripVista – Travel Booking Platform | *Node.js · Redis · Kong · MySQL · React.js*

- Led end-to-end delivery as Project Lead for a real-time booking platform (search, booking, payment), shipped in 4 months; earned Best Employee Award.

Hydration Room – Pharmacy Management | *React.js ·Tailwindcss*

- Built inventory and reporting dashboards with chart-based data visualization, cutting reporting time by 35% and page load time by 20%.
- Added an inter-clinic stock transfer flow, letting pharmacists move inventory from one clinic to another with tracked transfer records.

Healthcare Dollar – Hospital Search Portal | *MERN · Google Maps API · PostgreSQL*

- Built a hospital discovery and insurance calculation portal with Google Maps API integration and tuned PostgreSQL queries for faster lookups.

EDUCATION

B.Tech – Computer Science & Engineering | Sri Manakula Vinayagar Engineering College *Graduated 2022*

ACHIEVEMENTS

- Best Employee Award – Twilight IT Solution: Recognised for leading TripVista delivery under tight timelines, clearing critical blockers, and coordinating the team to ship within 4 months.
